

# Learning & Brain Development Lab

Thank you for your support –  
You make our research possible!

## Exploring Infants' First Year

We're thrilled to introduce our exciting **new infant research study**, which **explores how babies pay attention and learn from their caregivers** in the first year of life.

Watch Dr. Julie Markant talk about this study on Fox 8 local news [here](#).

## Let us know if your family has grown!

If you are pregnant or have a new infant or child: **update your information by letting us know [here](#)!**

Please also share the word with others that may be interested.

## What have We Discovered?

Learn more about completed projects that your child may have participated in

**NEW PUBLICATION!**

"Selective attention to lesson-relevant contextual information promotes 3- to 5-year old children's learning"  
King, & Markant (2022), *Developmental Science*

**Can relevant information in learning environments promote young children's learning?**

Learning & Brain Development Lab

## Sharing our Science

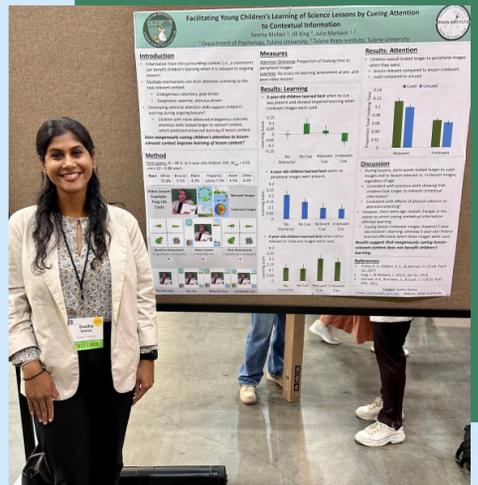

## In the Community

The LBD Lab values its involvement in the community and participation in community events. Thank you to our **community partners** for your support over the past year!

## With our Colleagues

Our graduate students have enjoyed presenting their research discoveries during conferences! Recently, they shared their findings at the **Cognitive Development Society in Pasadena, CA!**
